Open-source Gen AI Grand Challenge
In Partnership with
Meta

Participant's Journey

Steps to participate in the open-source grand challenge:

1. Submit the application which includes the approach notes before the specified deadline.
    a. Applicants may continue working on developing a proof of concept at this stage.
    b. Applicants who have a ready solution which aligns to the specifications of this grand challenge can submit their approach note in the specified format followed by the final presentation in PDF format and video link (submission link will be enabled on the webpage on Sept 02, 2024).
2. Register and join the informational webinar.
3. All the approach notes will be evaluated by evaluators based on a pre-defined evaluation criteria (available for download on the webpage).
4. Once approach note evaluation is completed, all applicants will be communicated with the status of their application. Based on the status:
    a. Applicants may continue working on developing a proof of concept
    b. Applicants may submit their existing solutions in specified format (video link and PDF)
5. Submit the final presentation in video and PDF format of your existing solution or the developed proof of concept before the deadline mentioned on the webpage.
6. All the submissions will be evaluated by the evaluators and grand Jury based on a pre-defined evaluation criteria (available for download on the webpage).

The top 5 teams from each category will be invited in the month of Nov-Dec 2024 to showcase their solutions to the jury members who will announce the winners and runners-up in each category during the showcase. The decision of the grand jury will be final and binding.
